

DALERAVEN LTD.

Groundworks & Civil Engineering Contractors

Supporting commercial developments across London & the Home Counties

ABOUT DALERAVEN

Established in 1987, Daleraven Limited is an experienced groundworks and civil engineering contractor based near Heathrow Airport, supporting projects across Greater London and the Home Counties.

We provide complete groundwork and civil engineering packages for main contractors, developers and private companies, supplying the labour, plant and materials required to deliver works safely, efficiently and to programme.

With a modern fleet of well-maintained excavators and ancillary plant, alongside continued investment in our equipment and resources, we are able to support a wide range of commercial and industrial projects.

Our experience includes schools, distribution centres, office blocks, car dealerships, laboratories, hotels, sports facilities and infrastructure works, with project values ranging from £100,000 to £6 million.

Built on long-term client relationships, high standards and reliable delivery, Daleraven continues to provide professional groundworks solutions tailored to the needs of each project.

CORE SERVICES

Daleraven provides a comprehensive range of groundworks and civil engineering services for projects. From early-stage site preparation through to drainage, foundations, concrete works and external finishes, our team has the plant, labour and experience required to support projects safely, efficiently and to programme. Our services include:

Site Clearance & Enabling Works

Preparing sites for development through clearance, excavation, demolition support and material removal.

Commercial Groundworks

Delivering groundwork packages for commercial and industrial schemes, tailored to the requirements of each project.

Drainage Infrastructure

Installation of drainage systems, attenuation tanks, pumping stations, petrol interceptors and associated infrastructure.

Foundations & Concrete Works

Excavation, preparation, reinforcement and concrete works for foundations, slabs and structural groundworks.

External Works & Hard Landscaping

Kerbing, paving, pathways, car parks, forecourts, ramps, steps and associated external finishes.

Plant, Labour & Materials

Supplying the resources, equipment and skilled operatives needed to deliver works effectively on site.

GROUNDWORKS AND DRAINAGE

Daleraven delivers comprehensive groundworks and drainage packages for commercial and industrial projects.

Our team supports projects from the earliest stages of site preparation through to the installation of key below-ground infrastructure, helping to create safe, stable and build-ready sites for the next phase of construction.

With experienced operatives, reliable plant and a practical understanding of programme requirements, we work closely with main contractors, developers and project teams to deliver works safely, efficiently and to specification.

Our groundworks and drainage capabilities include site clearance, excavation, trenching, drainage installation, attenuation tanks, pumping stations, petrol interceptors and associated infrastructure.

From initial enabling works through to complex drainage solutions, Daleraven provides the resources and experience required to keep projects moving.

FOUNDATIONS AND CONCRETE WORKS

Daleraven delivers foundation and concrete works for commercial and industrial projects across Greater London and the Home Counties.

Our team undertakes the preparation, excavation, reinforcement and concrete works required to support safe, durable and build-ready structures. From traditional foundations and reinforced concrete slabs through to specialist concrete packages, we work closely with main contractors and project teams to ensure each stage is delivered accurately and to programme.

With experienced operatives, reliable plant and a practical understanding of site coordination, Daleraven is able to support projects from early formation works through to the installation and completion of concrete structures.

Our foundations and concrete works capabilities include excavation, formation preparation, reinforcement, formwork, concrete pours, floor

slabs, retaining structures and associated groundworks.

By combining technical knowledge with dependable site delivery, we help ensure every project is built on strong foundations.

EXTERNAL WORKS & HARD LANDSCAPING

Daleraven delivers external works and hard landscaping packages for commercial and industrial projects, whether they be for residential, leisure or educational settings.

With experienced operatives, reliable plant and a strong understanding of site coordination, Daleraven works closely with main contractors and project teams to ensure external areas are delivered efficiently and to specification.

Our external works and hard landscaping capabilities include kerbing, edging, paving, pathways, car parks, forecourts, ramps, steps, street furniture and associated finishing works.

By combining practical delivery with attention to detail, we help ensure each project is completed with external areas that are functional, durable and professionally finished.

OUR PROJECTS

Dalraven supported the development of Shiplake Retirement Village. This large-scale, multi-stage project saw us deliver site clearance, full substructure, foundations, drainage, external services and hard/soft landscaping.

OUR PROJECTS

Daleraven supported construction of Camberley Leisure Centre, where we delivered a full substructure, drainage (including crated attenuation tanks), external services, external works (including macadam surfacing and hard/soft landscaping).

OUR PROJECTS

Daleraven completed a groundworks package for construction of four new schools built concurrently in Greenford, West London. Works consisted of foundations, drainage, 20,000 sq.m of ground and upper floors and 60,000 sq.m of external soft and hard landscaping. All works were carried out while existing schools were fully operational.

OUR PROJECTS

Phased construction of historic Atkins offices in Epsom starting with enabling works package to provide 395 parking spaces on site, inclusive of 10,000 lt crated soakaway, followed by basement and substructure works to 10,000 sq/m state-of-the-art development.

OUR PROJECTS

Set in beautiful parkland, Daleraven provided a full groundworks package to this new leisure centre development in Reading. Works included piling attendance, pile caps and ground beams, foul and surface water drainage, full hard and soft landscaping package including refurbishment of the existing car park and construction of a new overflow car park.

CONTACT US

Planning an upcoming project?

Daleraven works with main contractors, developers and commercial clients to deliver reliable groundworks and civil engineering packages across Greater London and the Home Counties.

From site clearance and drainage through to foundations, concrete works, external works and hard landscaping, our experienced team has the plant, labour and expertise required to support projects safely, efficiently and to programme.
